Education

Madhav Institute of Technology and Science 2023 – 2027
Bachelor of Technology in Computer Science and Design (CGPA: 8.97/10.0) Gwalior, India

- Among the top 1% of the batch
- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Projects

Product Intelligence & Validation Platform | Django, FastAPI, PostgreSQL, React 2026

- Built a product intelligence platform that aggregated pricing, availability, reviews, and video-based feedback from multiple online sources into unified product profiles.
- Designed an asynchronous data processing pipeline using Celery and Redis to execute product aggregation and AI-powered summarization without blocking user requests.
- Integrated FastAPI microservices with the Groq API to generate product summaries and expose insights through a Django REST backend.

Inventory Management System | Django REST Framework, PostgreSQL, Docker 2026

- Developed an API-first inventory management system supporting product, store, inventory, and order management through documented REST endpoints.
- Designed asynchronous order-processing workflows using Celery and Redis to handle inventory validation and background task execution.
- Containerized the application using Docker Compose and exposed interactive OpenAPI (Swagger) documentation for API testing and demonstration.

Saaf | Django, JavaScript, SQLite 2025

- Built a community platform enabling users to organize cleanliness drives, discover nearby events, and coordinate volunteer participation.
- Implemented role-based event management, participation workflows, and browser geolocation to improve local event discovery.
- Developed a complete CRUD application with 20+ backend endpoints and integrated AI-assisted story enhancement to encourage community engagement.

Technical Skills

Languages: C++, Python, Java, JavaScript, SQL
Frameworks: Django, Django REST Framework, FastAPI, React
Databases & Infrastructure: PostgreSQL, Redis, Celery, Docker
Tools: Git, GitHub, Postman, Swagger/OpenAPI

Achievements

-
- Solved **350+** algorithmic problems on [LeetCode](https://leetcode.com) with a current contest rating of **1648**.
