PROFILE

Final-year Computer Science student interested in backend development, distributed systems, and web applications.

EDUCATION

Madhav Institute of Technology and Science

Bachelor of Technology in Computer Science and Design

2023 – 2027 | Gwalior, India

- Among the top 1% of the batch (CGPA: 9.02)

SKILLS

Languages: C++, Python, Java, JavaScript, SQL

Frameworks & Technologies: Django, Django REST Framework, React.js, FastAPI, Celery, Redis

Frontend: HTML, CSS, Tailwind CSS, Vite

Databases & Infrastructure: PostgreSQL, SQLite

Tools: Git, GitHub

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

[Product Intelligence & Validation Platform](#) | 2026

- Built a platform that aggregates product information from multiple sources, including pricing, availability, reviews, and video-based feedback, to generate unified product insights
- Tools & Technologies: React, Django REST Framework, FastAPI, Celery, Redis, Groq API, SQLite, REST APIs
- Implemented asynchronous background tasks for data collection and AI-generated summaries without blocking the user interface

[Saaf – Community-Driven Neighborhood Cleanliness Platform](#) | 2025

- Built a community platform to organise cleanliness drives, manage events, and coordinate volunteers, solving the problem of unstructured local participation and communication
- Tools & Technologies: Django, SQLite, HTML, CSS, JavaScript, Django ORM, browser geolocation, basic AI text assistance
- Enabled users to discover nearby events, manage participation, and improve motivation stories with AI, making local initiatives more discoverable and engaging

[Typing Speed Test App \(JavaFX Desktop App\)](#) | 2025

- Developed a real-time typing test application to accurately measure typing speed and correctness with strict input control and live feedback
- Tools & Technologies: Java, JavaFX, TextFlow, TextField, real-time character and word comparison logic
- Implemented real-time speed calculation, mistake detection and automatic test completion

ACHIEVEMENTS

- Solved 300+ problems on LeetCode and actively participate in coding contests across various platforms
- Google Developer Groups (GDG)– Active Member (Campus Chapter)
- Participating in technical workshops and hackathons; contributing to community discussions
